There are 6 of these units as pictured. There is an aluminum center divider that can be pulled out to create a larger kennel on each level so 3 to 6 separate kennels in each unit. Each kennel also has a plastic drain mat in it. All have a sloping floor to the drain at the back. They are stainless steel and have been sprayed foamed for noise insulation at some time. Some of that insulation has come off on some units. They were used in a transporter. They are 48 inches wide and figure 30 inches deep including the latches. they are at least 72 inches tall.
